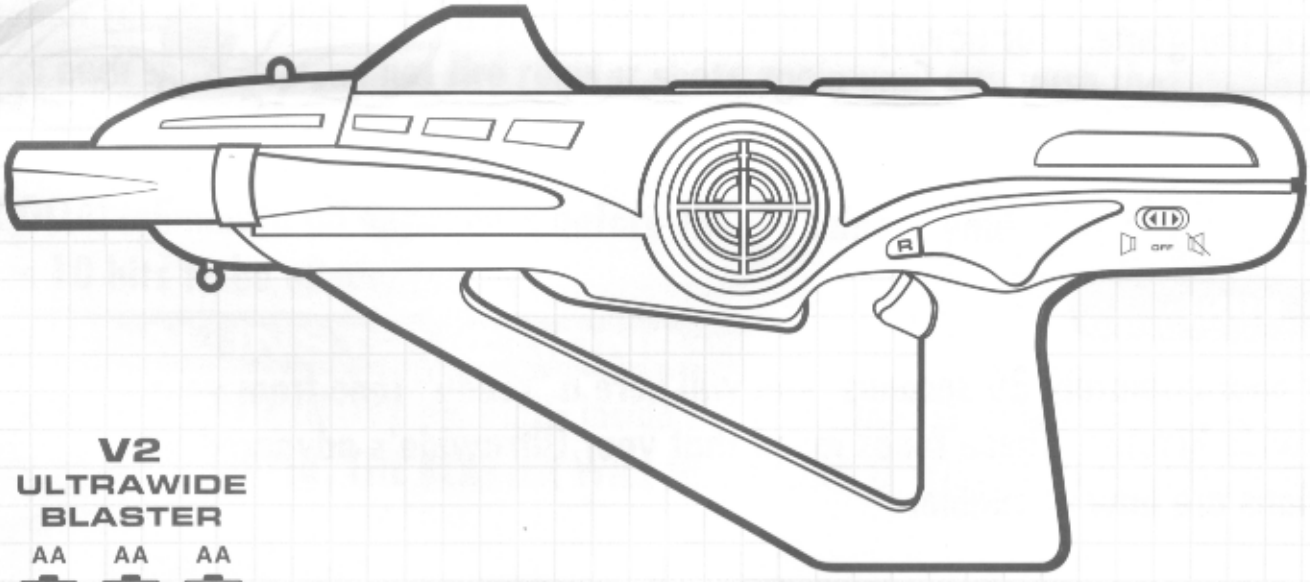
INSTRUCTIONS

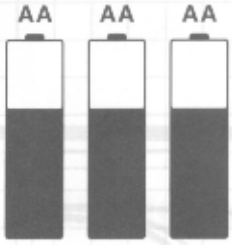
You are preparing to engage in the most advance laser play ever...
Laser Challenge™ V2 with ELS™ technology

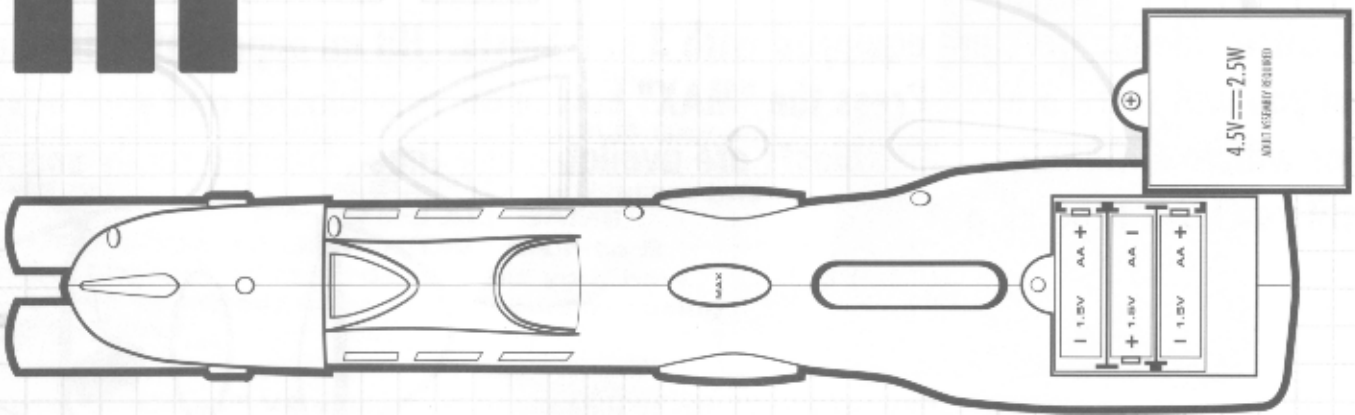
Your V2 Ultrawide blaster is serious gear! With rapid fire, silent mode and maxblasts you've got serious power. But wait until you see the power of Ultrawide mode... You can fire 350 foot blasts almost 50 feet wide! You might blast the entire opposing team in one shot.

Start Up: Power you Ultrawide Blaster by installing 3 fresh AA size alkaline batteries.



V2 ULTRAWIDE BLASTER



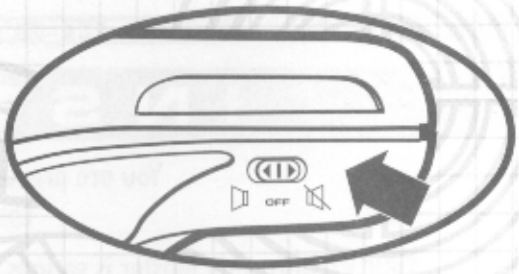


Suit Up:

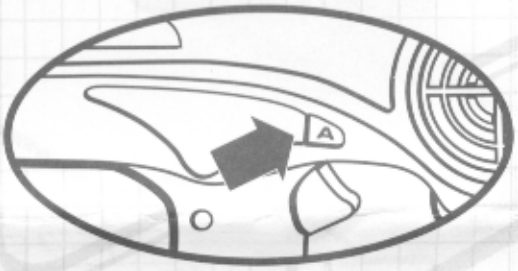
Equip all players with integrated front and back sensors and V2 laser blasters or any other Laser Challenge Brand vests.

Prepare for Play:

- Power up your Ultrawide blasters in either silent mode or standard mode.



- Press the Arm button to load your blaster with 25 shots. You may re-arm at any point and as many times as necessary during the game... for now ;)

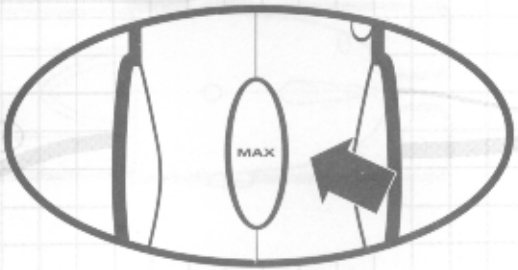


RUN!

After approximately 30 seconds, you will here a "ready" tone from your Ultrawide Blaster. These tones mean that your Ultrawide's advanced V2 functions are now available.

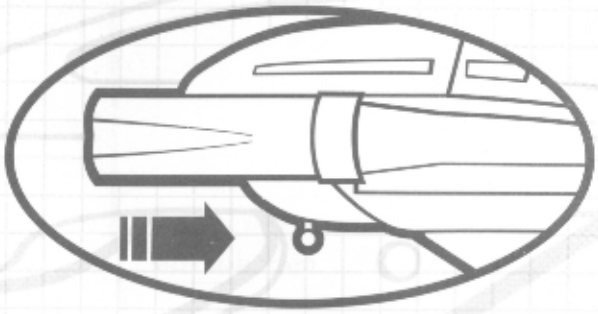
MAXBLAST

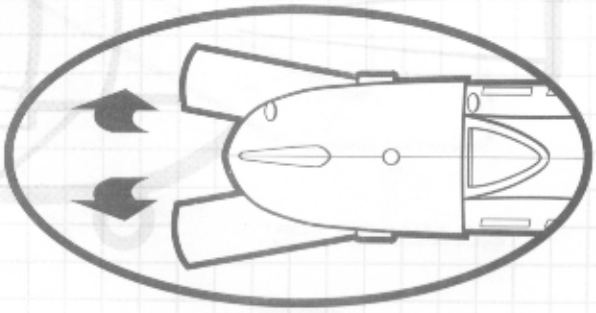
V2 Ultrawide blasters are equipped with 3 maxblasts. Hit an opponent with one and you will score 3 hits. Press the "MAX" button on your blaster and your next shot will be a Maxblast. Maxblasts are available any time after the ready sound, until you have used all 3.



ULTRAWIDE MODE:

The knob on the front of your Ultrawide blaster controls Ultrawide Mode. When you pull back on the knob, the barrels of your blaster will spread and you will hear a 5 second power up sound as your blaster gets ready to unleash an ultrawide blast. At the end of the power up, you can fire 1 ultrawide blast.





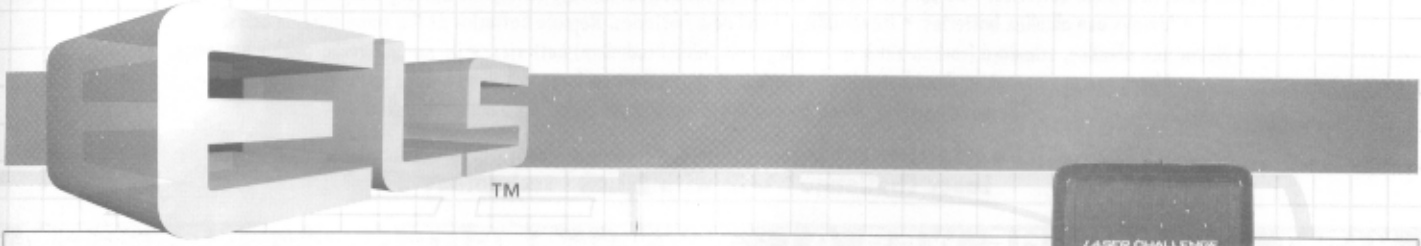
You have an unlimited supply of ultrawide blasts. Every time you pull the knob back, your blaster will power up for 5 seconds and give you an ultrawide blast.

You can not fire more than 1 ultrawide blast at a time. There is a 5 second delay between each shot. You can not fire regular shots again until you push the knob forward.

YOUR GOAL-eliminate all opponents before they eliminate you!
It takes 10 hits to be eliminated.

SPECIAL INSTRUCTIONS:

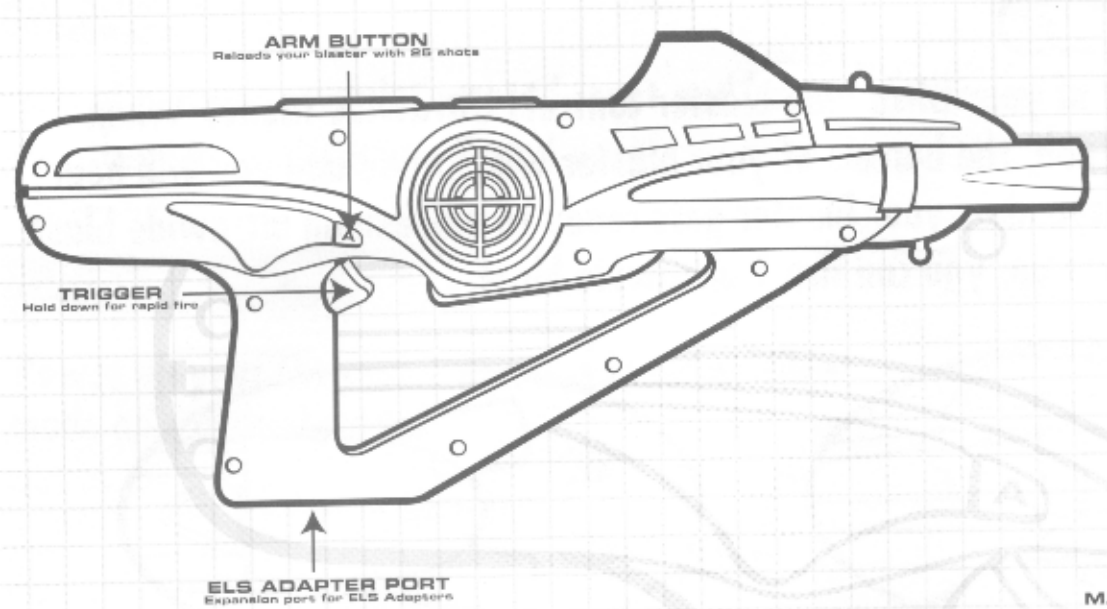
Special Note: DO NOT REMOVE the PLUG inside the ELS ADAPTER PORT unless you are installing an ELS ADAPTER. THE BLASTER WILL NOT WORK IF THIS PLUG IS REMOVED.

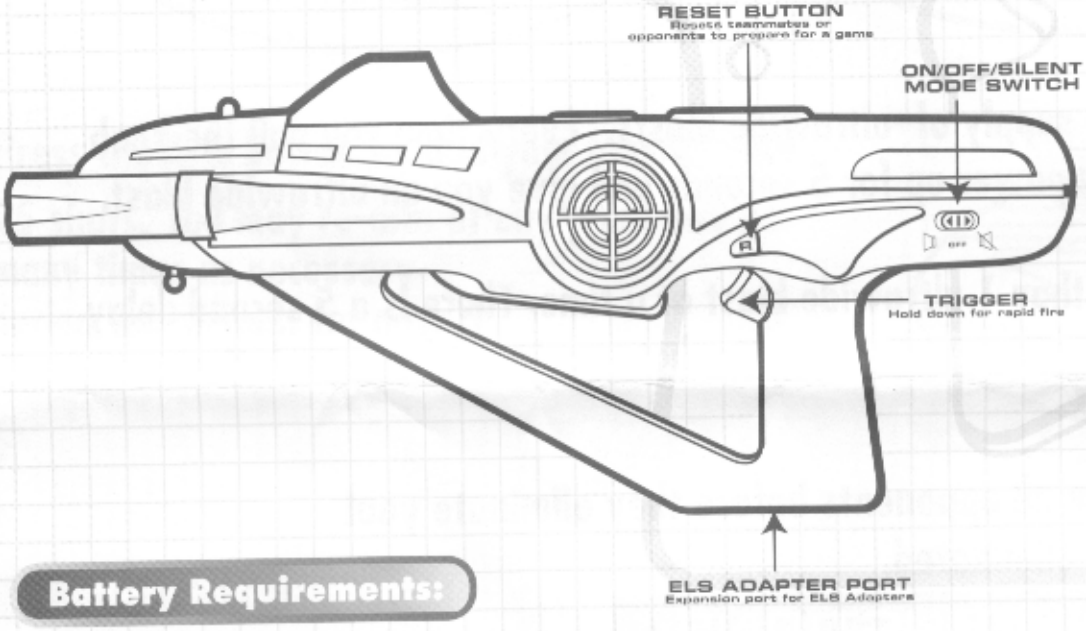


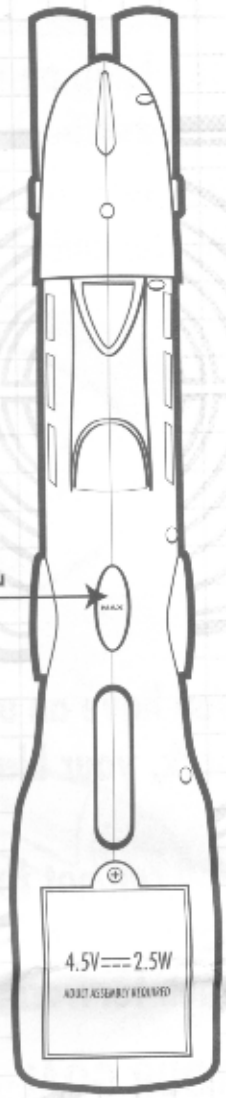
Your Ultrawide Blaster is equipped with an ELS Adapter Port. You can upgrade your equipment with ELS Adapters and the ELS Game system to access the most powerful laser game scoring system ever. The ELS™ Game System has the ability to track and record ALL GAME PERFORMANCE INFORMATION for up to 8 different players! It records who hit you, how many times you fired, what your accuracy rating is AND MORE!

ALL Laser Challenge™ V2 equipment is capable of playing on the ELS™ Game System.

ACCEPT NO IMITATIONS OR LIMITATIONS!
USE ONLY OFFICIAL LASER CHALLENGE GEAR







Battery Requirements:

ULTRAWIDE BLASTER = 3 AA Batteries

Fresh batteries will increase your Blaster's range and the sensitivity of all accessories. Should any component malfunction, try replacing batteries. If this does not work, call customer service.

IMPORTANT! OBSERVE THE FOLLOWING PRECAUTIONS TO PREVENT BATTERY LEAKAGE:

- Ask adult to replace batteries. • Be sure to insert batteries as instructed. Always follow the battery manufacturer's instruction.
- Always use alkaline batteries. • Never mix old and new batteries. Replace batteries at the same time, in pairs.
- Never mix alkaline, standard (carbon-zinc), or rechargeable (nickel cadmium) batteries. • Do not use rechargeable batteries.
- Always remove weak or dead batteries. • Check that the contact surfaces are clean before installing batteries.
- Remove batteries from the battery compartment before extended storage.
