FOR AGES 8 & UP

STEALTH ATOMIZER

The Stealth Atomizer was developed to compliment Laser Command™ laser gaming sets. Its unique design and function make it among the finest laser products available.

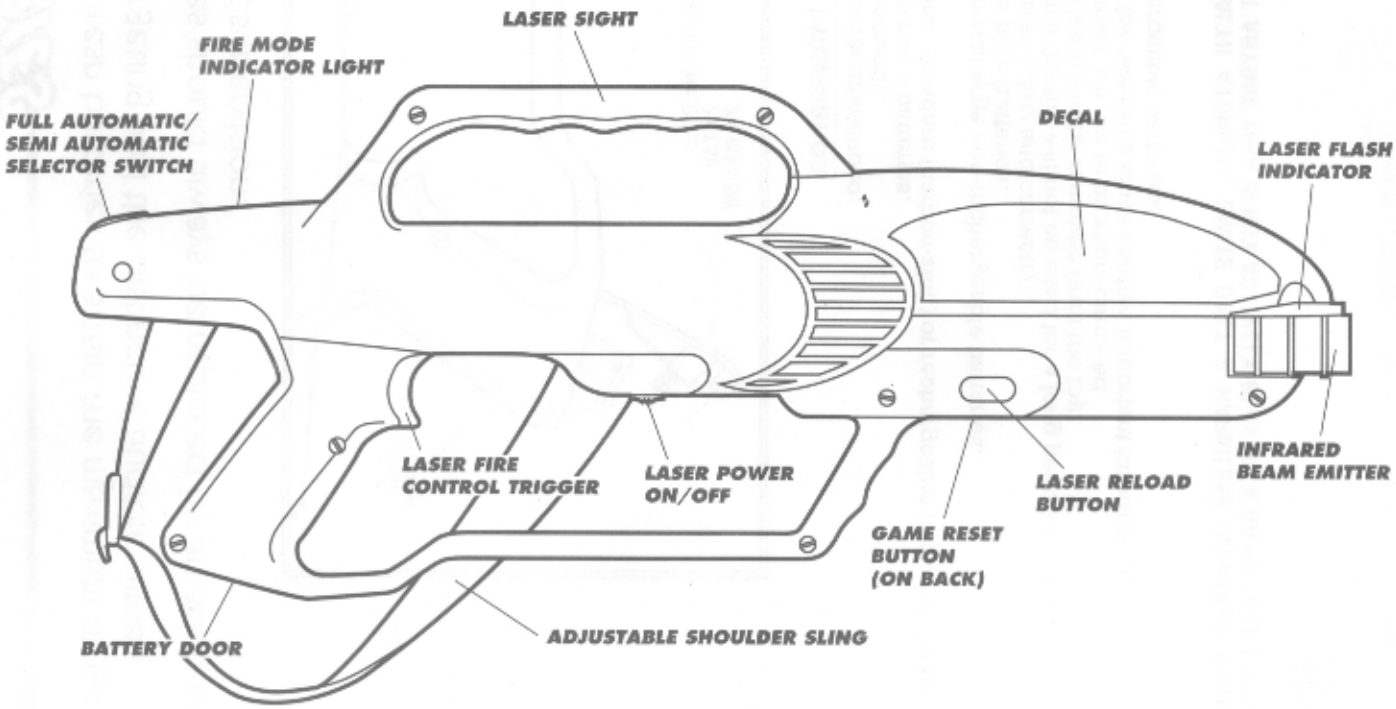
The Stealth Atomizer represents the ultimate in laser firing technology! Select between fully automatic 15 shot firing or semi automatic firing modes. The LED laser fuel light bar lets you monitor your available laser rounds before reloading.

The Stealth Atomizer concentrates a focused IR beam at a distance of over 200 feet for effective results! There is no compromise with the Stealth Atomizer...

GET INTO THE GAME...

GET INTO COMMAND!

THE STEALTH ATOMIZER



STEALTH ATOMIZER

- The Stealth Atomizer power switch is located just inside the fore-grip on the bottom of the gun. Slide it to the **"ON"** position and listen for the **"RELOAD"** sound; this will tell you the Stealth Atomizer is ready to operate.

- At the rear of the gun is the fire mode selector switch. Push the switch to the left for **"FULL AUTO"**; now you are in fully automatic firing mode. In full auto the Stealth Atomizer will fire 15 laser shots automatically; when the shots are depleted you will hear a **"CLICK"**; just press the reload button located on the right side of the gun in front of the fore-grip for another 15 rounds of laser shots.

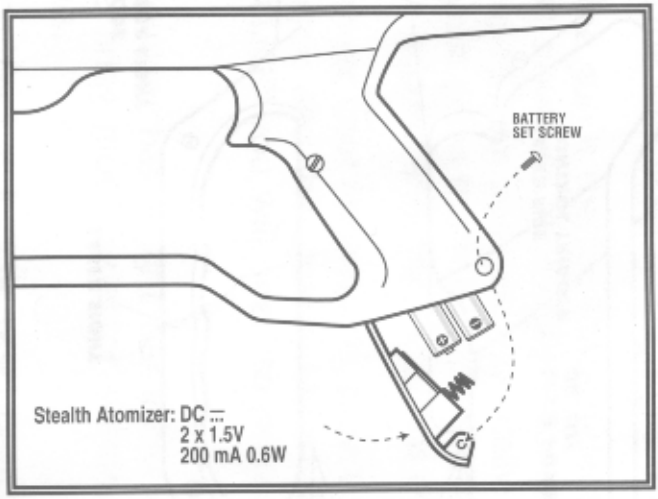
- To engage the single shot firing mode, slide the firing mode selector switch to **"SEMI AUTO"** firing mode and the Stealth Atomizer will fire 5 single laser rounds. When you hear the **"CLICK"** you will need to press the reload button to engage 5 more laser rounds.

- The Stealth Atomizer has a light bar located near the back of the gun and just forward of the firing mode selector switch; this light bar will indicate the firing mode and status.

- The Stealth Atomizer has a game reset button located on the left side of the fore grip. Just point the Stealth Atomizer at the game target and press the reset button; the distinctive power-up sound of the target sensor tells you the new game series is ready to begin.

BATTERIES

- Always use fresh batteries to attain the maximum range, accurate targeting and the distinctive audible signals.
- The batteries should always be replaced by an adult or under adult supervision.



Battery Safety Information

- Use only batteries recommended.
- Insert batteries correctly.
